3rd INTERNATIONAL NANOMEDICINE CONFERENCE

SYDNEY 2012
International NanoMedicine Conference

2-4th July 2012
Coogee Beach, Sydney, Australia

Welcome to OzNanoMed 2012

It is a great pleasure to invite you to attend the 3rd International NanoMedicine Conference taking place at Coogee Beach Sydney Australia from July 2-4 2012. From this seaside location, we will again assemble a world-class group of researchers and clinicians, with plenary speakers including Dr Alan Trounson President of the Californian Institute of Regenerative Medicine, John Pickup Professor of Diabetes and Metabolism at King's College London and School of Medicine, Guy's Hospital UK, Prof Tanja Weil, Ulm University Germany and Patrick Boisseau, CEA France. These speakers will join an ever growing list of nanomedicine invited speakers.

As with previous years, the great Australian hospitality will make this a conference to remember, including social and networking activities that are aimed at forging collaboration and exploring ideas though multidisciplinary approaches. But it will be the presentation of research that will again be the star of this conference.

All researchers be they from medicine, chemistry or science that work in the nanomedicine field are acutely aware of the great need to prevent and cure diseases which have emotional, social and economic ramifications.

Key themes include

- **Imaging**
- **Nanosafety**
- **Tissue regeneration and repair**
- **Sensing & diagnosis**
- **Delivery of therapeutics (drugs, siRNA, DNA, Peptides)**
- **Translational medicine**

This year we will again have special programs to encourage Early and Mid Career Researchers to present their work. If you are interested in submitting an abstract for either oral or poster please visit the website.

We hope you are able to join us for Great Science at the Beach.

Prof Tom Davis, Prof Maria Kavallaris & Prof Justin Gooding
(Conference Chairs)
