

Australasian College of Physical Scientists & Engineers In Medicine

Summer School

12th & 13th August
Darwin

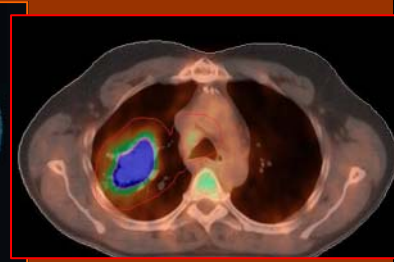

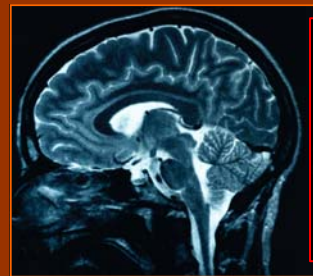

2011

Functional Imaging in Radiotherapy

ACPSEM's 3rd annual summer school will focus on Functional Imaging in Radiotherapy. Take an intensive look at Functional Imaging with the world's leading experts over two days at the Crowne Plaza, Darwin.

Participants will enjoy cutting edge panel discussions regarding issues in Functional Imaging as well as special presentations on all the latest developments and research.

Reserve your place early to avoid disappointment.

Cost including GST

TEAP Registrars: Free of Charge

ACPSEM Members: \$198

Non-members: \$325

Topics Include:

- Functional Imaging Methods
- 3D and 4D
- Impact on RT Treatment Planning

International Guest Speaker :

Associate Professor Robert Jeraj (USA)

Associate Professor Jeraj is one of the world's leading authorities in Functional Imaging. He is a well-published researcher, with interests in Image Guided Therapy for Cancer, Molecular Imaging, Radiation Therapy, Optimization, Monte Carlo Modelling and Dosimetry.

A/Prof Jeraj gained his BSc(Physics) and PhD at the University of Ljubljana, Slovenia and currently works for the department of Medical Physics at The University of Wisconsin, USA.

For further information please contact Amy Milner (Amy.Milner@acpsem.org.au) or Tomas Kron (Tomas.Kron@petermac.org)

Places are Strictly Limited. Register at www.acpsem.org.au
