

Physical & Engineering Sciences in Medicine

For instructions to authors, please go to: <https://www.springer.com/journal/13246/submission-guidelines>

Physical & Engineering Sciences in Medicine (PESM) publishes articles on medical physics (including radiotherapy, radiography, imaging, and nuclear medicine), biomedical engineering, and mathematical modelling applied to medicine and biology. The journal is indexed and abstracted internationally. Submissions may be in the form of original reviews, scientific papers, scientific notes, technical papers, educational notes, book reviews and letters to the editor.

Authors should indicate into which of these categories they believe their manuscript fits. All manuscripts are reviewed by (at least) two anonymous referees. Revised manuscripts are subjected to the same refereeing procedure. Final review is undertaken by the Editor and Editorial Board, whose decision is final. There are no page charges and off prints may be purchased from Springer.

Abstracts are available online at <http://www.springer.com/13246>

Copyright

It is the author's responsibility to have taken the necessary steps to obtain written permission for using any material that might be protected by copyright. In turn, acceptance of a manuscript for publication in PESM implies transfer of copyright to ACPSEM. However, intellectual property remains with the authors and/or their employers, but copyright is maintained by ACPSEM.

Author Statement

A formal letter of submission signed by all authors, indicating that the manuscript has not been published previously and has not been submitted elsewhere concurrent with this submission should accompany the manuscript. The letter may be in electronic form and should also state that all authors have made a significant scientific contribution to the manuscript.

Conflicts of interest should be disclosed.

Authors should register and submit manuscripts online [here](#) using the format described in the *Instructions to Authors*.
